Amblyopia Therapeutic Apparatus is a device used for the treatment of Amblyopia, also called "lazy eye". Amblyopia is decreased vision in one or both eyes due to abnormal development of vision in infancy or childhood. In amblyopia, there may not be an obvious problem of the eye. Vision loss occurs because nerve pathways between the brain and the eye aren't properly stimulated. The brain "learns" to see only blurry images with the amblyopic eye even when glasses are used. As a result, the brain favors one eye, usually due to poor vision in the other eye. The global average sales price of Amblyopia Therapeutic Apparatus is in the decreasing trend, from 518 USD/Unit in 2012 to 473 USD/Unit in 2016. With the situation of global economy, sales prices will be in decreasing trend in the following five years. Amblyopia Therapeutic Apparatus is widely used in Homecare, hospital and Ophthalmologic Center. The most proportion of Amblyopia Therapeutic Apparatus is hospital, and the sales in 2016 are about 98 K Unit. The trend of hospital application is decreasing. China is the largest consumption market of Amblyopia Therapeutic Apparatus, as doctors in Europe and USA prefer the practice treatment, patching, pharmacologic blurring, etc. China account for 92% market share in 2016, and the other account for 8%. Market competition is
