The global Angioplasty Balloons market was valued at 1837.72 Million USD in 2021 and will grow with a CAGR of 2.93% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Angioplasty balloon is a minimally invasive, endovascular procedure to widen narrowed or obstructed arteries or veins, typically to treat arterial atherosclerosis. The growth of the market is attributed to favorable government policies, approval & commercialization of several angioplasty balloons, and increasing coronary & peripheral interventions. Angioplasty is a minimally invasive procedure, hence patients and surgeons prefer this procedure over high cost stent placements.
