The global Anhydrous Hydrogen Fluoride (AHF) market was valued at 261.65 Million USD in 2021 and will grow with a CAGR of 9.04% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Anhydrous hydrogen fluoride (AHF) is a colorless liquid corrosive, and has a sharp and penetrating odor. AHF vapor reacts with the moisture in the atmosphere to form a visible dense cloud. In consumption market, the growth rate of global consumption is smooth relatively. China is still the mainly consumption regions due to the advanced production technology and rapid development of economy. However, the demand in China is mainly concentrated in the field of refrigerants. Anhydrous Hydrofluoric Acid can be classified as three types according to the HF purity, include 99.99 AHF, 99.90 AHF and 99.70 AHF. It can be widely used in many industries. Survey results showed that 57% of the Anhydrous Hydrofluoric Acid market is chemical industry, 19% is used in Mining & Metallurgical industry. The downstream market demand is from Fluor polymer field. Now, the market capacity excess supply; resulting in the overall operating rate at a low level. The major raw material for Anhydrous Hydrofluoric Acid is fluorite and sulfuric acid. In the global market, supply of raw materials is full. Fluorite mainly concentrated in China, Mongolia, South Africa and Mexico. In the world wide, giant manufactures mainly distribute in those areas. China has a long history and unshakable status in this industry. Fluctuations in the price of the upstream product will impact on

the production cost of Anhydrous Hydrofluoric Acid industry. The price changes in 2017 are mainly due to the sharp rise in the price of fluorite.
