Anthocyanin powder is utilized as coloring agent in various foods and beverages. It is an odorless and flavorless flavonoid pigment present in vegetables and fruits including beets, purple grapes, cabbage and berries, commonly in soft drinks, Jams & Jellies, Sugar Confectioneries and Frozen Products. Europe was the largest regional anthocyanin market in 2014 and is expected to witness significant growth over the forecast period owing to growing preference for naturally derived antioxidants in the region. Ireland and UK are anticipated to be the frontrunners in the European market owing to increasing food and beverages demand in these regions. Europe was closely followed by North America which is presumed to witness considerable growth owing to increasing natural colorants and viscosity modifiers demand. U.S. is anticipated to be the frontrunner in the region owing to increasing anthocyanin demand in food applications. Asia Pacific is projected to witness significant growth owing to shifting consumer preferences towards healthy packaged food products. China and India are anticipated to be the frontrunners in the region owing to increasing food and beverages demand coupled with growing consumer disposable income. South America is presumed to witness considerable growth in anthocyanin market owing to increasing

healthy product demand in form of capsules and beverages. Future demand is expected to come from emerging economies including Mexico, Brazil, China and India.
