The global Anti-Corrosion Coatings for Thermal Power market was valued at 864.7 Million USD in 2021 and will grow with a CAGR of 1.87% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Anticorrosive coating refers to a kind of liquid or solid material coated on the surface of an object that can form a film under certain conditions to protect, decorate or have other special functions (insulation, rust prevention, mildew prevention, heat resistance, etc.). Among many applications, coal-fired power generation has the largest market share. In 2019, consumption of coal-fired power generation reached 84 percent. The industry producers are mainly PPG, Akzo Nobel, Haihong Senior, Jotun paint, Kansai paint, Xuanwei and so on. Akzonobel is the world's largest producer, with an annual output of nearly 20,000 tons in 2019, accounting for 12% of global output. There are three main types of anti-corrosion coatings in the thermal power industry: solvent-based, water-based and powder coatings, among which solvent-based is the most important product type. In 2019, the output of this type will exceed 100,000 tons, accounting for 66% of the global total. Next is water-based coating, this kind of coating is a kind of environmental protection coating, as the enhancement of environmental protection consciousness, its growth rate will exceed solvent-based coating in the future. As the main market of thermal power is China, the major consumer of anti-corrosion coatings in thermal power industry is China (mainland), whose consumption

reaches 134,000 tons in 2019, accounting for 86% of the total global consumption. Followed by the US, with less than 5 per cent of consumption.
