Anti-peptic Ulcer drug is one of various classes of drugs with different action mechanisms used to treat or ameliorate peptic ulcer or irritation of the gastrointestinal tract. China's anti-trust crackdown on foreign pharmaceutical companies has left many foreign investors in the healthcare industry shocked. The Chinese government has had no qualms about openly stating that it prefers hospitals to purchase from domestic producers. That said, China's homegrown manufacturers of medical devices and medicine still lack the sophistication to produce many of the more advanced health care products the country needs. Amid rising living standards and an aging population, China's healthcare needs are set to rise sharply in the coming years.
