The global Antibody market was valued at 8225.87 Million USD in 2021 and will grow with a CAGR of 5.1% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Monoclonal Antibodies (IgMs) are antibodies that are made by identical immune cells, cloned from a single parent cell. They are therefore of constant structure and bind to the same foreign markers (called ?antigens?). The technology behind the generation of monoclonal antibodies was discovered in 1972 by César Milstein and Georges Köhler - scientists at the Roche-funded Basel Institute for Immunology - who were later to win the Nobel Prize. Monoclonal antibodies revolutionized biological research and built the basis for the use of therapeutic antibodies in medicine and for the entire biotechnology industry. In Vitro Diagnostics (IVD) are tests used to detect disease, infections and other medical conditions. The growing need of IVD testing arises due to increasing incidences of chronic and infectious diseases and growing geriatric population prone to immunological disorders. Moreover, increased application of personalized medicines and widespread knowledge of rare diseases are boosting the growth of IVD market. In the recent years, antibody used for IVD industry developed rapidly in China There is a gap between China antibody manufacturers and Europe/America. In China, about 26% of consumption antibody import from foreign manufactures, such as Hytest, Roche, Thermo Fisher. There are also some local producers, such as Fapon, Genscript, Kitgen,

Leadman, MACCURA, Wondfo, etc. Fapon is the leading player in China. In classification, antibody can be divided into polyclonal antibody and monoclonal antibody. Monoclonal antibody hold the mostly share the China share about 91.12% In application, antibody downstream is wide and recently antibody has impacted by the hospital, medical research institutions, etc. Hospital holds about 91.21% of whole China antibody consumption in 2016. The manufacture region is concentrated in Central China, East China and Southwest China, of which East China is the largest region with the share 33.20% in 2016. The sales shares of Southwest China and Central China were 15.12% and 14.56%.
