Apple Cider Vinegar, otherwise known as cider vinegar or ACV, is a type of vinegar made from cider or apple must and has a pale to medium amber color. Unpasteurized or organic ACV contains mother of vinegar, which has a cobweb-like appearance and can make the vinegar look slightly congealed. By type, the apple cider vinegar market is segmented into filtered and unfiltered. The unfiltered type segment is likely to be the most attractive segment in the forecast period owing to presence of mother in the product which stands of proteins, enzymes, and friendly bacteria that give the product a murky appearance.
