The global Aqua Ammonia market was valued at 566.02 Million USD in 2021 and will grow with a CAGR of 1.45% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography (North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Ammonia solution, also known as ammonia water, ammoniacal liquor, ammonia liquor, aqua ammonia, aqueous ammonia, or (inaccurately) ammonia, is a solution of ammonia in water. It can be denoted by the symbols $\text{NH}_3(\text{aq})$. It is sometimes thought of as a solution of ammonium hydroxide. Although the name ammonium hydroxide suggests an alkali with composition $[\text{NH}_4^+][\text{OH}^-]$, it is actually impossible to isolate samples of NH_4OH . The ions NH_4^+ and OH^- do not account for a significant fraction of the total amount of ammonia except in extremely dilute solutions. The global Aqua Ammonia industry has a rather high concentration. The major manufacturers are concentrated in North America, China, Europe and India, such as Yara, CF, Shandong Everlast AC Chemical, Hangzhou Hengmao Chemical and DOW. At present, Yara is the world leader, holding 5.90% production market share in 2016. Aqua Ammonia can be mainly divided into Industrial Grade Aqua Ammonia, Electronic Grade Aqua Ammonia and Pharma Grade Aqua Ammonia which Industrial Grade Aqua Ammonia captures about 73.69% of Aqua Ammonia market in 2016. According to our research and analysis, manufacturers from USA are the major leaders in the international market of Aqua Ammonia.
