## Abstracts

The global Artificial Ventilation and Anesthesia Masks market was valued at 1730.71 Million USD in 2021 and will grow with a CAGR of 1.88% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Artificial ventilation and anesthesia masks are most frequently used in operating rooms owing to rise in the number of dental centers and hospitals, a surge in insurance reimbursement, and high-unmet needs in emerging economies. North America, Europe, Asia-Pacific, RoW are the key regional markets analyzed in the study. In 2014, North America accounted for the largest share of over 55% in 2014. Key factors attributing to its high share are the presence of high-quality healthcare infrastructure, better reimbursement scenario, and high investment in research and development. Furthermore, technological advancements, high consumer awareness about different treatments available, products and associated benefits are the key forces impacting overall market dynamics. However, Asia Pacific is expected to be the fastest-growing region over the forecast period, mainly due to growth in public and private healthcare facilities, improvement in reimbursement scenario, and increase in the disease prevalence rates.
