The global Artificial Zeolite market was valued at 4084.23 Million USD in 2021 and will grow with a CAGR of .5% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Artificial Zeolite or Synthetic zeolites, a class of inorganic silicate materials, are widely employed as heterogeneous catalysts in a variety of traditional and emerging catalytic processes, are sold into a wide range of industrial, commercial and consumer applications. Zeolites ability to selectively adsorb various molecules allows them to be used for water and contaminant removal from various industrial chemical feedstocks and in industrial gas separation. Unlike naturally occurring zeolites, synthetic zeolites are manufactured in energy-intensive chemical processes and are significantly more expensive than natural zeolite. Synthetic zeolites are also designed to meet ion-specific exchange requirements in highly discriminating applications. The synthetic zeolite lattice is generally manufactured with a silica to alumina ratio of 1 to 1 as compared to the 5 to 1 ratio of natural Zeolite. In terms of the Synthetic Zeolite, the market is dominated by the top players from United States, Europe and Japan, like UOP (Honeywell), CECA (Arkema), BASF, Zeochem AG, Tosoh, Grace Davison, Zeolyst and Clariant etc.
