The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Asynchronous motor, also called induction motor, is an AC electric motor in which the electric current in the rotor needed to produce torque is obtained by electromagnetic induction from the magnetic field of the stator winding. Asynchronous motor therefore does not require mechanical commutation, separate-excitation or self-excitation for all or part of the energy transferred from stator to rotor. Asynchronous motor's rotor can be either wound type or squirrel-cage type. Three-phase squirrel-cage asynchronous motors are widely used in industrial drives because they are rugged, reliable and economical. Single-phase asynchronous motors are used extensively for smaller loads, such as household appliances like fans. Europe, USA and China are the main production base of asynchronous motor, key manufacturers: ABB, Emerson, GE, TECO, Regal-Beloit, Nidec, Siemens, Tatung, Hitachi, WEG, Bosch Rexroth, SEW-Eurodrive, Cummins, YASKAWA , Toshiba, VEM, NORD, Landert, ABM Greiffenberger, SPG, Brook Crompton, Sterling Electric, Wolong, XEMC, JLEM, Huali Group, Jiangte , WNM, Ydmotor, Dazhong are mostly located here. The production of asynchronous motor was 31991.5 K units in 2014, of which 83.41% is produced in Europe, USA, and China.
