Abstracts

The global Athletic Footwear market was valued at 5037.93 Million USD in 2021 and will grow with a CAGR of 3.25% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Athletic Footwear is designed and manufactured according to the sports characteristics of the people to participate in. The soles of the Athletic Footwear are different with the ordinary shoes, which can play a buffer role to prevent the injuring. Therefore, the performance of Athletic Footwear soles and uppers material determines the ability of its injury prevention. In the production of the Athletic Footwear, raw materials, production processes have determined the quality of Athletic Footwear. As global overall economic downward trend in the past few years, and international economic situation is complicated, in the next few years there will be many uncertainties, and coupled with Athletic Footwear industry in continuous demand growth on the market in the past few years, more and more companies enter into Athletic Footwear industry, the current demand for Athletic Footwear product is relatively low, lack of demand, excess supply. Low quality Athletic Footwear products on the market do not sell well; Athletic Footwear's price is lower than past years. The signal of market price change indicates the trend in the Athletic Footwear industry, low-end product has excess capacity, high-end product is in short supply.
