The global Atrial Fibrillation Devices market was valued at 2901.69 Million USD in 2021 and will grow with a CAGR of 8.22% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

This report studies the Atrial Fibrillation Devices market. Atrial fibrillation (also called AFib or AF) is a quivering or irregular heartbeat (arrhythmia) that can lead to blood clots, stroke, heart failure and other heart-related complications. Atrial Fibrillation Devices are the devices used for atrial fibrillation therapy, including access, diagnostic, visualization and ablation products to assist physicians in diagnosing and treating various irregular heart rhythms. About 4.4% people out of diagnosed atrial fibrillation population are treated using ablation technology in the U.S., Europe, and Japan combined. The atrial fibrillation population treated with ablation is expected to grow with a double digit rate in these regions. The increasing prevalence of atrial fibrillation and advancement in the ablation technologies drive the use of ablation products in the treatment of atrial fibrillation.
