The global Autogenous Mill market was valued at 49.17 Million USD in 2021 and will grow with a CAGR of 1.09% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography (North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Autogenous mills are so-called due to the self-grinding of the ore: a rotating drum throws larger rocks of ore in a cascading motion which causes impact breakage of larger rocks and compressive grinding of finer particles. It is similar in operation to a SAG mill as described below but does not use steel balls in the mill. Also known as ROM or 'Run Of Mine' grinding. The Major sales regions of Autogenous Mill are Asia-Pacific, Europe and Mideast & Africa, which accounted for about 76.11% of sales market share in 2017. Asia-Pacific is the largest consumption region with a market share of 30.75% in 2017.
