The global Automated Cell Culture market was valued at 1.97 Million USD in 2021 and will grow with a CAGR of 8.42% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Automated cell cultures grow and maintain cell lines by mechanically controlled procedures. Regular cell culturing involves various procedures such as inoculation-excessive care is required since the procedure is more susceptible to the contamination during the inoculation as well as growth of the cell. Key players operating in the global Automated Cell Culture market are Danaher (highest market share of 22%), Sartorius, GE, Tecan, Agilent, and among others. North America is the largest consumption place, with a consumption market share nearly 57.7% in 2018. Following North America, Europe are also very important market with the consumption market share of 32.7%. Asia-Pacific is also an important consumption area.
