## Abstracts

The global Automated Dispensing Machines market was valued at 1266.2 Million USD in 2021 and will grow with a CAGR of 5.98% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Automatic dispensing machines (ADM) or (automated drug cabinets) are a computerized drug storage and dispensing device used in the health care settings like hospitals and nursing homes, and are located at the point of care (the ward, ICU, ED) rather than in the central pharmacy. Hospitals held a majority share of 56.1% of the end-use segment in 2017. Lack of adequate pharmacy inventory management practices in the hospitals is one of the factors indicating the increasing risk of medication errors. A key factor impacting the market growth is the lack of pharmacists and technicians.
