Abstracts

The global Automated Sortation System market was valued at 428.07 Million USD in 2021 and will grow with a CAGR of 6.89% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact wwhich will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market verdors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Automatic sorting machine is the machinery that according to the preset computer instruction to sorting of goods and delivering the goods to the specified location. Automated Sortation System is similar to conveyors but typically having higher capacity and can divert containers more quickly. Typically used to distribute high volumes of small cartons to a large set of locations, automated sortation systems offer a highly accurate and efficient means of sorting, routing, consolidating, and diverting a wide range of parcel types to unique destinations for the purposes of order selection, processing, packaging, palletizing, storing, and shipping.Smart IT systems have prompted an expansion in responsiveness and allowed retail distribution centers to significantly reduce inventory by receiving and dispatching goods just-in-time. Some retailers are expected to handle about 90% of their goods in this way. Manufacturers of many fast moving consumer goods are opting for sortation systems to handle cartonized products as they come off the production line to reduce handling steps. Sortation systems help in reducing cost per case with faster delivery, reducing the inventory in distribution centers. The global Sortation System is segmented on the basis of type, application, and region. The type segment sub-segmented into linear and loop

sortation. Among these, Loop Sortation System is the fastest growing market during the forecast period. Loop sortation systems which is also known as circle sorters are configured with tight radius curves to maximize space. It typically comprised of series of cells linked together on a track. Products are inducted onto these cells manually or automatically along with conveyor systems. Once the cell and associated inventory arrive at a divert location, the divert mechanism on the loop sortation system is actuated, sending the inventory to the associated location. The global Sortation System market is growing due to increase in shipping accuracy & efficiency with sortation system. Automated sortation system is a revolution in mechanical industry. It is designed to sort number of consumer products such as packaged food & beverages, post & parcels, medicines, textiles and others, thereby deliver the packaged products on time. It is generally used for small size products and mainly installed in industries like food & beverage, pharmaceutical, retail, and healthcare. Automated sortation system reduces the time of operations or simulation of raw materials. In a high-volume distribution environment, there is a need of high speed packaging systems determined by the sortation equipment which often determines production speed. These systems are more reliable due to the automation, time consistency, and constant high speed. It is possible to sort high capacity products in automated sortation system with consistency and high speed. However, high installation cost, high maintenance cost are expected to hinder the market of automated sortation system.

market?s competitive landscape and detailed information on vendors and comprehensive details of factors that will challenge the growth of major market vendors.

Global and Regional Market Analysis: The report includes Global & Regional market status and outlook 2016-2027. Further the report provides break down details about each region & countries covered in the report. Identifying its sales, sales volume & revenue forecast. With detailed analysis by types and applications.

Market Trends: Market key trends which include Increased Competition and Continuous Innovations.

Opportunities and Drivers: Identifying the Growing Demands and New Technology

Porters Five Force Analysis: The report provides with the state of competition in industry depending on five basic forces: threat of new entrants, bargaining power of suppliers, bargaining power of buyers, threat of substitute products or services, and existing industry rivalry.

Key Reasons to Purchase

To gain insightful analyses of the market and have comprehensive understanding of the global market and its commercial landscape.

Assess the production processes, major issues, and solutions to mitigate the development risk.

To understand the most affecting driving and restraining forces in the market and its impact in the global market.

Learn about the market strategies that are being adopted by leading respective organizations.

To understand the future outlook and prospects for the market.

Besides the standard structure reports, we also provide custom research according to specific requirements

1 REPORT OVERVIEW

1.1 Study Scope
1.2 Key Market Segments
1.3 Players Covered: Ranking by Automated Sortation System Revenue
1.4 Market Analysis by Type
  1.4.1 Global Automated Sortation System Market Size Growth Rate by Type: 2021 VS 2027
  1.4.2 Linear Sortation Systems
  1.4.3 Loop Sortation Systems
1.5 Market by Application
  1.5.1 Global Automated Sortation System Market Share by Application: 2022-2027
  1.5.2 Retail and E-commerce
  1.5.3 Post and Parcel
  1.5.4 Food and Beverage
  1.5.5 Pharmaceutical and Medical
