The global Automated Truck Loading System (ATLS) market was valued at 74.02 Million USD in 2021 and will grow with a CAGR of 14.3% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Automatic Truck Loading System (ATLS) is the first fully automated system to load or unload pallets, slip-sheets, racks, or other types of unit loads. Automatic truck loading and unloading always requires two 'combined' systems: one system in the truck and a 'fixed' installation inside the loading and unloading dock. When a truck docks the entire load is loaded or unloaded automatically. Automatic Truck Loading System allow increased efficiency. The most commonly used truck loading and unloading systems are for shuttle services between production facilities and distribution centres. Truck loading and unloading times are reduced from half an hour to a matter of minutes. Return on investment times are short due to the immediate savings compared to traditional loading and unloading (using fork-lift or hand pallets trucks).Global Automated Truck Loading System (ATLS) key players include Joloda International, Ancra Systems, Actiw Oy, BEUMER GROUP, TRAPO AG, etc. Global top five manufacturers hold a share about 51%. Europe is the largest market, with a share about 32%, followed by North America and Asia-Pacific. In terms of type, Non-modified Truck ATLS is the largest segment, with a share about 82%. And in terms of application, the largest application is Logistics and Transportation Industry, followed by Food and Beverage Industry, and Automotive

Industry.
