The global Automatic Hand Dryer market was valued at 4.12 Million USD in 2021 and will grow with a CAGR of 14.25% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Automatic hand dryers are electric machines found in public bathrooms. They may either operate with the push of a button or automatically using a sensor. Hand washing is an important part of hygiene, and so an effective method of drying the hands is necessary. The high growth rate due to the adoption in various end-use industries including hotels and restaurants, office buildings, educational institutes, shopping & commercial complex and multiplexes, railway station, and airports. The ecological and economic benefits offered by hand dryers are also anticipated to fuel the product adoption. On the basis of product type, automatic hand dryers are categorized into hot hand dryer and jet hand dryer. Jet hand dryers accounted for 49.32% revenue share in 2017 and are estimated to grow at a CAGR of more than 16.5% over the forecast period. This can be primarily attributed to the increasing installation at airports, hotels and restaurants, office buildings, and shopping complexes. The high cost associated with jet air as compared to hot air variants may hinder the product demand in the near future. The hotel and restaurant end-use segment accounted for more than 60% of the overall market share in 2017, which is estimated to increase over the forecast period. This can be attributed to the rapid growth in the hospitality industry on account of surge

in the number of restaurants, pubs, and hotels paired with the increasing tourism activities worldwide. The European hand dryers market is anticipated to be a major regional segment owing to the growing adoption of eco-friendly, hassle-free, and cost effective devices. This region accounted for over 34.6% of the overall revenue share in 2017 and is estimated to grow at a CAGR of more than 13.6% over the forecast period. The demand in Asia-Pacific is estimated to show robust growth on account of the developing infrastructure in countries including China, India, and Thailand coupled with the increasing awareness of the benefits of using technologically advanced devices. This region accounted for over 29% of the overall revenue share and is estimated to grow at a CAGR of more than 17% over the forecast period.
