Automated Guided Vehicle (AGV) is an unmanned, computer-controlled mobile transport unit used for material handling and transportation in a wide range of industries. Also known as a self-guided vehicle or self-propelled vehicle, an AGV is a vehicle that is powered by a battery or an electric motor and is able to perform tasks without human supervision or operation. A rising disposable income, demand for different vehicle types from end users and stricter regulatory compliances mandating the use of industrial materials are the primary factors responsible for booming AGV demand in the automotive sector of the AGV market. AGV's are characterized by their ability to work in demanding, hazardous, and harmful conditions boosting their appeal across different domains.
