The global Automotive Aluminium Extrusions market was valued at 6323.33 Million USD in 2021 and will grow with a CAGR of 2.34% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Aluminum Extrusion is a plastic deformation process in which a solid cylinder of aluminum (billet) is forced by compression through a smaller die opening. The billet is typically preheated to facilitate the deformation process. Aluminium extrusions can play key roles in integrated engineering solutions for automotive structures and component parts. One of the main advantages is to reduce the weight of the car. Automotive Aluminium Extrusions are mainly manufactured and sold by Constellium, China Zhongwang, Hydro (Sapa), Otto Fushs, STEP-G, APALT, Kaiser Aluminium, Exlabesa, Arconic, AV Alumintran, ETEM and Inalsa; and these companies occupied about 50% market share in 2019. Geographically, Asia-Pacific is the largest sales market in the world, which took about 55% of the global consumption volume in 2019.
