The global Automotive Connectors market was valued at 152.94 Million USD in 2021 and will grow with a CAGR of 6.01% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Connectors are critical to today`s cars. Without them, it would be nearly impossible to build or service a car. Whenever a bundle of wires passes through or attaches to a component of the car that might have to be removed, there must be a connector there to allow for that removal. A single connector can have more than 100 wires. Advanced Automotive Connectors manufacturers are from developed regions like North America, Europe and Japan. While some of them have built plant in China to meet local market demand. Europe is the largest consumption market with market share over 28%. Followed Europe, North America is the second largest market with share about 23.5%. China manufacturing more than 28 million unit new cars in 2016, but the market size is still in the third place due to the low consumption amount per car.
