The global Automotive Engine and Transmission Sensors market was valued at 6315.72 Million USD in 2021 and will grow with a CAGR of 2.36% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

MEMS-based sensors have proved to be the perfect solution in the field of automotive, where there is a growing need for smaller form factor for sensors with improved performance. Hence, the MEMS technology plays a pivotal role in downsizing the structure of automotive pressure sensors. Today`s top-end vehicles constitute up to 100 different types of sensors, of which 30 would be MEMS sensors. Pressure sensors acquire the largest part of MEMS sensors for automotive applications. The pressure sensors market for hybrid electric vehicles (HEV) is estimated to grow at the highest CAGR during the forecast period.
