The global Automotive Hydrostatic Fan Drive System market was valued at 449.02 Million USD in 2021 and will grow with a CAGR of 4.98% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Hydrostatic fan drive systems can keep combustion engines at their optimum operating temperature, even under the most difficult of application conditions. This enables mobile equipment, buses and commercial vehicles to comply with strict emissions regulations for exhaust gas and noise. The Asia Pacific region is estimated to dominate the hydrostatic fan drive system market for automotive, by volume as well as value. The Asia Pacific region accounts for about 50% of the global automobile production. The region comprises emerging economies such as China and India along with developed nations such as Japan and South Korea. The growing infrastructural developments in developing countries such as China and India and the increasing stringency of emission regulations are the key factors driving the growth of automotive hydrostatic fan drive system market in the Asia Pacific region.
