Non-woven fabric is a new generation of environmentally friendly materials. It is moisture-proof, breathable, flexible, light, non-flammable, easy to decompose, non-toxic and non-irritating, rich in color, low in price, and recyclable. Non-woven fabrics are widely used in automobiles, and have gradually replaced raw materials such as automobile interiors and soundproof cotton. It has been used in automotive parts since more than 40 years ago. Non-woven fabrics can be used for sound insulation, air filtration, heat insulation, reinforcement and to improve the comfort and reliability of passengers. In addition to these advantages, non-woven fabrics are considered economical materials by many automobile companies because of their high strength and durability.
