The global Automotive On-board Power Inverter market was valued at 230.05 Million USD in 2021 and will grow with a CAGR of 2.77% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

An inverter is a device that is plugged into a vehicle`s 12v power supply. This device converts the 12v power supply to 230v AC mains power thereby enabling the user to operate the electrical and electronic equipment safely at a distance from the standard mains power. Several electronic gadgets require more power and hence there is growing need for inverters which convert DC to AC. The automotive on-board power inverter s are contrived to run on the 120-volt AC power.
