The global Automotive Pressure Sensors market was valued at 4687.74 Million USD in 2021 and will grow with a CAGR of 5.37% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

These sensors are used in automobiles to measure pressure both above and below the atmospheric pressure. These sensors are calibrated, and compensation is provided for temperature fluctuations to maximize the accuracy of the sensors. The sensors are coated with a gel passivation layer to make them resistant to chemicals and organic fluids used in automobiles like diesel and gasoline. ABS is estimated to be the fastest growing market for automotive pressure sensors, by application. Factors contributing to the growth of this segment include the mandates related to safety and security features.
