The global Automotive Seat Sliders market was valued at 1827.13 Million USD in 2021 and will grow with a CAGR of 5.77% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

As the most important part of the seat assembly, seat slide Rail has high technical content and patent protection. It is not only an important functional part, but also one of automobile safety parts. The seat slide track and the manual lock device can realize the manual adjustment of the seat in the horizontal position, and the button and the driving motor can realize the automatic adjustment of the seat in the horizontal position. In seat safety performance indicators, the seat slide rail need to bear more than 24 kn static tension, and to ensure the slide under positive pressure and side pull in all directions to force equilibrium, when the force does not produce function failure, it is to the design of slide rail cross-section shape and slippery course materials (tensile strength reached more than 600 mpa) itself puts forward very high requirements, another technical difficulties lies in the slide rail manufacturing technology, it requires production enterprises have very high large precision mold and press. China`s research and application in this field lags behind the advanced level.From the perspective of product type and technology, Automotive Seat Sliders can be divided into manual slide track, electric slide track, manual long slide track and electric long slide track. At present, manual slide tracks dominate the entire market, with a market share of 76% in 2019.

With the development trend of intelligent, scientific and comfortable car seats, electric slide tracks and long slide tracks will have a growing market share. At present, the major manufacturers in the global market include Adient, Brose, Faurecia, Toyota Boshoku, Imasen Electric Industrial, AVIC, Lonsheng, Shanghai Yenpu, Huayang, Hyundai Transys, LMC, Minth Group, etc. In 2019, the top 10 major manufacturers accounted for over 88% of the sales volume.
