The global Autonomous Mobile Robots market was valued at 1064.72 Million USD in 2021 and will grow with a CAGR of 28.03% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

An autonomous mobile robot (AMR) is a robot that performs behaviors or tasks with a high degree of autonomy. The AMR relies on autonomous navigation where no wires, tape, GPS or other navigation markers are required. Its laser guidance system assures precise navigation, obstacle avoidance and human safety. The drive-around mapping with laptop adjustments enables fast and easy route updates and additions. The demands placed on the functionality of autonomous robotic systems are significantly higher compared to conventional industrial robots. The aim is that mobile systems operate autonomously in unknown and dynamic environments to fulfill their assigned tasks. For this purpose, it is essential to explore and model the environment in a suitable way. The information gathered by sensors has to be combined to allow for an accurate positioning. In addition, the perceived surroundings have to be consolidated in an exact map representation. Having acquired this knowledge, the robot is able to plan an optimal collision-free path to a given goal and to perform complex handling tasks. The key players are Swisslog (KUKA), Omron Adept, Clearpath Robotics, Vecna, Mobile Industrial Robots, SMP Robotics, Cimcorp Automation, Aethon, Locus Robotics, Fetch Robotics, Geekplus Technology, 6 River Systems and so on. Among them, Swisslog

(KUKA), Omron Adept, Geekplus Technology and Mobile Industrial Robots are the leader of autonomous mobile robots market. The top 4 players account for more than 50% market share in global. In terms of product application, Autonomous Mobile Robots are generally used in hotels, healthcare, manufacturing, logistics and warehouse, among which logistics and warehouse account for the largest proportion of the market share, about 55% in 2019.
