UAV Autopilot provides autonomous flight control for multirotor and fixed-wing commercial drone aircraft. The USA production of the UAV autopilot is about 10 K Units in 2015. The production revenue is relative small contrast to UAV market; it has great market; Due to the production and capacity and technology problem, large parts of UAV autopilot are imported; The price has been fluctuation continuously; the average price is about 1636 USD Per Unit in 2015. The gross margin has the similar trend with the price; The import and export volume is relative small, the import market includes Canada, Germany, and Denmark and so on; currently, the UAV autopilot has none of anti-dumping phenomenon; In the future, the UAV autopilot will have a good future; the price fluctuation has relationship with the raw material and the anti-dumping phenomenon. The technology will more mature and the industry is more dispersion. The installation rate of UAV autopilot is becoming more and more.
