Abstracts

The global Axial Flow Compressors market was valued at 426.43 Million USD in 2021 and will grow with a CAGR of 3.92% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Axial flow compressors produce a continuous flow of compressed gas, and have the benefits of high efficiency and large mass flow rate, particularly in relation to their size and cross-section. They do, however, require several rows of airfoils to achieve a large pressure rise, making them complex and expensive relative to other designs. For the major players of Axial Flow Compressors, MAN SE is estimated to maintain the first place in the ranking in 2020. Followed by Xi'an Shaangu Power, GE, Siemens, Elliott Group, Mitsui E&S Group and Shenyang Blower Works. These 7 players are estimated to account for 77% of the Global Axial Flow Compressors revenue market share in 2019.
