As global environmental pollution becomes more serious, people are increasingly worried about the safety of products. So organic foods are gaining popularity, especially organic baby foods, and organic baby foods have received a lot of attention in recent years. Most baby foods are based on glass packaging, but the number of foods in bags is also growing rapidly. The popularity of the bag is mainly because it is easy to carry and easy to use. It conforms to the fast-paced lifestyle of modern people and improves the child's ability to eat independently. Bag packaging can protect the food well and prolong the shelf life of the food. Compared with boxed and glass, bagged food takes up less space. In order to meet the nutritional needs of children, consumers require a variety of products to choose from. Manufacturers are constantly updating their product lines and innovating them to differentiate them from other competitors. For example, in July 2013, Plum Organics launched the organic food brand Mighty 4, which sells organic fruits, vegetables and grains.
