Abstracts

The global Baby Toiletries market was valued at 583.34 Million USD in 2021 and will grow with a CAGR of 5.26% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Baby toiletries ensures good health and help maintain proper hygiene of the baby. For instance, baby oils and lotions are used to make the baby's skin smooth and soft. Baby powders are used as lubricants in skin folds to relieve the baby of prickly heat and to impart pleasant and clean fragrance. Choosing the right baby toiletry for the baby's skin or hair is very important, as presence of certain ingredients can harm the baby. Experts suggest that people should avoid products that contain mineral oils, as they have a greasy texture that makes it hard for the baby's skin to breathe and eliminate toxins, which can lead to dryness or allergies such as eczema. Increasing awareness regarding the importance of hygiene, rising population of working women across the globe, rise in disposable income and growing birth rate around the globe are expected to drive the baby toiletries market. Significant growth in the birth rate and rising number of working women have been the major factors driving the demand for baby toiletries. Additionally, growing awareness about hygiene in babies, growing disposable income and rapid urbanization have propelled the growth of baby toiletries market. However, presence of chemicals in the baby's products is restraining the growth of baby toiletries market. North America and Europe are expected to dominate the market due to rising demand

for baby toiletries products and presence of major market players across countries such the U.S. and Canada. However, India and China are expected to boost the baby toiletries market on account of increasing urbanization and rising awareness regarding hygiene of new born babies.
