The global Bacteriophage market was valued at 26.61 Million USD in 2021 and will grow with a CAGR of 16.72% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

A bacteriophage, also known informally as a phage, is a virus that infects and replicates within bacteria and archaea. Phages attach to bacterial cells, and inject a viral genome into the cell. The viral genome effectively replaces the bacterial genome, halting the bacterial infection. Bacteriophages are composed of proteins that encapsulate a DNA or RNA genome, and may have structures that are either simple or elaborate. The United States is the largest consumer market, accounting for about 38%, and Europe is the second largest market, accounting for about 26%. The market for Bacteriophage is fragmented with players such as NPO Microgen, Proteon Pharmaceuticals, Phagelux, Intralytix, Microeos, Eliava BioPreparations, Locus Biosciences, Inc, Pharmex Group, LLC, Pherecydes Pharma, APS Biocontrol Ltd.
