Ball screws are force and motion-transfer devices in the family of power-transmission screws. They operate like conventional power screws but the rolling friction of bearing balls replaces sliding friction. Ball screws consist of a screw, nut, and balls that operate similarly to bearing components. Japan, China Taiwan, Europe, USA and China are now the key producers of ball screws. There are some producers in China to counterfeit ball screws or provide OEM for special customers with low price and poor quality. The high quality products are mainly supplied by overseas producers out of China, specifically from Japan, Germany, USA and Italy.
