Abstracts

The global Bamboo Furniture market was valued at 8404.9 Million USD in 2021 and will grow with a CAGR of 2.74% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Bamboo furniture is undergoing a revolution as of late. The rustic furniture of the sixties and seventies, made from unmilled bamboo shoots and poles, is still available. There is also a new face to this type of furniture as well. Milled, sanded and finished bamboo furniture rivals any hardwood furniture in durability and beauty. Add to the fact bamboo is one of the world's most environmentally-friendly resources to raise, harvest and use, and it's clear why bamboo has become one of the hottest furniture building materials on the market.
