### Abstracts

The global Barcode Printers market was valued at 2307.78 Million USD in 2021 and will grow with a CAGR of 3.49% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Barcode printers are specialty printers which enable the printing of barcode labels or tags that can be directly printed on or attached to physical objects. They are commonly used to label retail items or label cartons with Universal Product Codes (UPCs) or European Article Numbers (EANs) before shipment. They are also used for printing barcodes on wristbands used for personal identification in hospitals or events. North America and EMEA are expected to dominate the barcode printers market over the forecast period owing to increased demand from the U.S. and Western European countries. Asia Pacific, Eastern Europe, and Latin America are expected to witness substantial growth due to the establishment of production facilities in these economies and increased investments by MNCs in retail and industrial infrastructure. There has been an influx of suppliers manufacturing and selling low-cost printers, primarily from Asia Pacific, which has resulted in the barcode printers market being highly commoditized.
