The global Bare Thermocouple Wire market was valued at 153.78 Million USD in 2021 and will grow with a CAGR of 4.51% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Bare Thermocouple Wire is wire without any insulation. Normally it is sold on a spool and ordered as a pair. Usage is typically for making a small thermocouple in applications requiring special considerations. Bare Thermocouple Wires are available for the element types K, T, J, E, N, S, R, B. Bare thermocouple wires are used when an insulation of the legs is not necessary, or if the temperature is very high so that normally used materials do not withstand. In this report, bare thermocouple wire only counts the thermocouple grade and wire form type. There are many manufacturers of bare thermocouple wire in the world, Sandvik (Kanthal), Aperam, Isabellenhütte, Furukawa Techno Material, OMEGA Engineering, Thermo-electra, Pyromation, Pelican Wire, Thermo Sensors, Yamari Industries, Concept Alloys, Nanmac, TMH GmbH, etc. are large companies in the market of bare thermocouple wire. Sandvik (Kanthal) is the global leading for sale of bare thermocouple wire, which makes up about 16% of the market share in terms of revenue. The main sales areas of bare thermocouple wire are in North America and Asia-Pacific, which together account for about 60% of the global revenue market share. The Asia-Pacific market plays an important role in driving the development of the global market, thanks to the rapid growth of China, Japan in

particular. Benefit from extensive downstream demand. It is expected that the bare thermocouple wire market will continue to maintain a steady growth rate about 4%-5%. Among them, the glass and ceramics industry application market accounted for the world's largest market share, accounting for close to 15% of the global bare thermocouple wire sales volume market share.
