Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Barium sulfate with the chemical formula BaSO₄. It is a white crystalline solid that is odorless and. It occurs as the mineral, which is the main commercial source of and materials. The growth of the market is majorly attributed to the rapid development of the paints and coating industry of household car and electric vehicle, as well as the growing demand from small- and medium-scale enterprises in developing countries. The China market is expected to grow at the highest CAGR between 2016 and 2022. China is expected to be the next largest consumer of the barium sulfate market. Increase in the industrial growth coupled with the civil constructions in China is expected to boost the consumption of barium Sulfate in Asia Pacific. The growing automobile industry in Asia Pacific is expected to boost the overall demand for paints and coating which in turn is expected to drive the growth of the barium Sulfate market in this region. Some of the barium sulfate manufactured is consumed as a component of the oil well drilling fluid. Barium Sulfate is mainly used to increase the density of the fluids. Thus, the growing demand for highly purified fluids has boosted the overall growth of the barium sulfate market. Barium sulfate is widely used in the paints and coating industry. Barium Sulfate is widely used as a component for white Plastic Industry that is used in paints industry.

Barium sulfate is transparent in nature and thus, it is used as filler or to modify the consistency of the paints. Thus, the growing automobile industry is expected to boost the overall growth of the paints and coatings industry which in turn is expected to boost the global demand for the barium Sulfate market. Growing construction industry is also expected to contribute to augment the overall growth of the barium Sulfate market. Barium Sulfate is widely used as plastic filler during the manufacturing of polypropylene and polystyrene.
