Beer glassware (from left to right): summer glass, tasting glass, snifter, session glass
Beer glassware comprises the drinking vessels made of glass designed or commonly used for drinking beer. Different styles of glassware exist for a number of reasons: they may reflect national traditions; legislation regarding serving measures; practicalities of stacking, washing and avoiding breakage; promotion of commercial breweries; folk art, novelty items or use in drinking games; or complementing different styles of beer for a variety of reasons, including enhancing aromatic volatiles, showcasing the appearance, and having an effect on the beer head. Several kinds of beer glassware have a stem which serves to prevent the body heat of the drinker's hand from warming the beer.
