The global Benzene market was valued at 8057.29 Million USD in 2021 and will grow with a CAGR of 3.28% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography (North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Benzene is one of the natural components of crude oil. It is a highly flammable colorless liquid with a sweet odor. Benzene is primarily used as an intermediate to make chemicals such as styrene, ethylbenzene, cumene, cyclohexane, and nitrobenzene. More than 50% of the entire benzene produced is processed into styrene, which is used to make plastics and polymers. A small amount of benzene is used to make rubbers, detergents, explosives, lubricants, dyes, drugs, and pesticides. Currently, the Asia-Pacific is the largest consumer of benzene and all of its downstream derivatives, which consumed more than 47.0% of the total consumption in 2017. Among all the countries, China dominates the benzene market, which consumed the maximum volume of benzene in 2017. The market volume consumption of these products is comparatively low in the ROW region, but is expected to show the highest CAGR from 2018 to 2023, followed by the Asia-Pacific.
