The global Beryllium Oxide (BeO) Powder market was valued at 77.63 Million USD in 2021 and will grow with a CAGR of 1.23% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography (North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Beryllium oxide (BeO), also known as beryllia, is an inorganic compound with the formula BeO. This colourless solid is a notable electrical insulator with a higher thermal conductivity than any other non-metal except diamond, and exceeds that of most metals. As an amorphous solid, beryllium oxide is white. Its high melting point leads to its use as a refractory. The global revenue of beryllium oxide (BeO) powder increases with the 3.25% average growth rate. USA and China are the mainly consumption regions due to the bigger demand of downstream applications. In 2016, these two regions occupied 65.43% of the global consumption volume in total.
