Abstracts

The global Beverage Stabilizers market was valued at 101.13 Million USD in 2021 and will grow with a CAGR of 3.4% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

A stabiliser is an additive to food which helps to preserve its structure. Typical uses include preventing oil , water emulsions from separating in products such as salad dressing; preventing ice crystals from forming in frozen food such as ice cream; and preventing fruit from settling in products such as jam, yoghurt and jellys. The key drivers for the market`s growth are the rise in beverage consumption, the multi-functionality of beverage stabilizers, and the increase in the use of natural ingredients in foods due to increasing consumer awareness about healthy diets. However, adherence to international quality standards and regulations for beverage additives such as stabilizers and the fluctuation of raw material prices act as restraints for the market`s growth. Innovation in technology and emerging applications using customized stabilizer blends are significant growth opportunities for the market.
