Biaxially Oriented Nylon film, also known as BOPA film, is made of polyamide resin, which can be used for a wide range of applications especially where high barrier requirements to gas, fat and transmission of aroma are necessary. BOPA film, made of nylon 6, is used in the packaging solutions in various industries. BOPA has a very high tensile strength, anti-puncture strength, excellent flexibility, resistance, high gas and aroma barrier properties, good transparency and gloss, excellent printability, a broad operating temperature range. Therefore, BOPA film is especially suitable for the packaging of perishable foods, frozen and cooked foods, vegetables, agricultural products and aquatic products packaging, medical supplies, electronic products packaging. Referring to the concrete application, food industry has the largest market share, which accounted for 76.12% share in 2017. BOPA film can also be used in the household products packaging, the second largest consumption field with the share of 16.26%. China and Japan are the major production bases of BOPA film currently. Besides, China is the largest production base of BOPA film presently. Some companies in China, like Xiamen Changsu, are actively expanding their capacity, indicating a

promising demand.
