The global Bio Solvents market was valued at 6787.13 Million USD in 2021 and will grow with a CAGR of 6.54% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Bio solvents are environmentally friendly solvents or biosolvents derived from biomass, such as plants, trees or animals (the biomass can have undergone physical, chemical or biological treatment).North America is a major bio solvents consumer and accounted for over one-third of total market volume in 2013. The regional is characterized by high level of awareness regarding health and environmental effects of conventional solvents coupled with stringent environmental regulations. Increasing construction spending by the U.S. government to improve public infrastructure in the region is expected to drive paints & coatings demand which in turn is expected to have a positive impact on the regional bio solvents market over the forecast period. Recovery of U.S. automotive industry after a slump due economic recession is also expected to have a positive impact on the regional bio solvents market. Asia Pacific is touted to register significant growth rate on account of growing construction and automotive industries. Rapid industrialization in emerging markets of China and India are expected to drive adhesives and sealants demand. This trend coupled with growing concerns regarding degradability of conventional solvents is expected to drive further the Asia Pacific market growth.
