The global Biochemical Oxygen Demand (BOD) Analyzer market was valued at 7.33 Million USD in 2021 and will grow with a CAGR of 4.65% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Biochemical Oxygen Demand or Biological Oxygen Demand, is a measurement of the amount of dissolved oxygen (DO) that is used by aerobic microorganisms when decomposing organic matter in water. Biochemical Oxygen Demand is an important water quality parameter because it provides an index to assess the effect discharged wastewater will have on the receiving environment. The higher the BOD value, the greater the amount of organic matter or 'food' available for oxygen consuming bacteria. If the rate of DO consumption by bacteria exceeds the supply of DO from aquatic plants, algae photosynthesis or diffusing from air, unfavourable conditions occur. Depletion of DO causes stress on aquatic organisms, making the environment unsuitable for life. Further, dramatic depletion can lead to hypoxia or anoxic environments. BOD is also used extensively for wastewater treatment, as decomposition of organic waste by microorganisms is commonly used for treatment. Global Biochemical Oxygen Demand (BOD) Analyzer key players include Hach (Danaher), WTW (Xylem), LAR Process Analysers, Lovibond (Tintometer), Lianhua Technology, etc. Global top five manufacturers hold a share over 30%. Asia-Pacific is the largest market, with a share over 50%, followed by Europe and North America, both

have a share about 45 percent. In terms of product, Benchtop BOD Analyzers is the largest segment, with a share about 85%. And in terms of application, the largest application is Industrial and Municipal Wastewater, followed by Ground/Surface water.
