Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Diseases hamper the quality and quantity of plant production. Chemical agents such as herbicides and pesticides have been used effectively since long as suppressors of many varieties of pests. However, pests have developed resistance to pesticides due to their extensive usage. Biocontrol agents, which help decrease the negative effects of plant pathogens, can act as substitutes to pesticides. Biocontrol agents are considered effective source that inhibits the growth of pests.
