The global Biodegradable Superabsorbent Materials market was valued at 11937.54 Million USD in 2021 and will grow with a CAGR of 3.5% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Superabsorbent materials are one of the key products used for manufacturing baby diapers. These polymers are used for absorbing as well as retaining fluids, especially under moderately high pressure. Europe was the largest market accounting for 32% of the global volume in 2017. Stringent regulations regarding the use of synthetic polymers for manufacturing personal care and other medical hygiene products is anticipated to provide considerable scope for the industry in the future. This scenario is likely to reflect especially in Germany, UK, and France among other countries in the region.
