Bioherbicides consist of phytotoxins, pathogens, and other microbes used as biological weed control. Bioherbicides may be compounds and secondary metabolites derived from microbes such as fungi, bacteria or protozoa; or phytotoxic plant residues, extracts or single compounds derived from other plant species. The global top 5 Bioherbicide manufacturers include Marrone Bio Innovations, Belchim Crop Protection, Koppert Biological Systems, BioHerbicides Australia and Emery Oleochemicals, top 6 players accounted for about 70% of global market share in 2019. Base on types, Bioherbicide can be divided into Mycoherbicide, Bacterial Herbicide and Others. Among them, Mycoherbicide Occupied the largest sales share, it accounyed for 47.93% sales share in 2018. In terms of the applications, Agricultural Crop field occupied the most share, with a 64.46% in 2018. Geographically, Americas was the largest consumer of bioherbicides, accounting for almost 38.61% of the global market. The growing awareness among farmers about organic farming and the environment safety concerns in the region are some of the significant factors driving the market. Initiatives taken by the regional governments towards health and environment safety are likely to play an important role in driving the market in the US and Canada.
